

SEND Support and Development – Intervention Training: Lego Therapy Groups

Date: 24th April 2024

Time: 14:00 – 15:30

Location: CELT Conference Room, Poltair

Facilitator: Dr Wendy Thomas

Lego Therapy is a small group intervention facilitated by an adult who has attended the initial training session. Lego Therapy groups directly work on social communication, expressive and receptive language skills, attention and listening and executive functioning skills.

The training will go through how to set up, facilitate and run a Lego Therapy Group and follow up online support and supervision sessions will be provided to facilitate the development of these groups in school settings.

Pre and post measures are built into the intervention to ensure that the intervention is identifying the impact of the time allocated.

Lego Therapy Groups can be successfully run in KS1/KS2 and KS3; they are also an excellent intervention for use in ARB and/or specialist school settings.
