

# SEND Support and Development – Developing Co-Regulation Plans for Students Experiencing Challenges with SEMH

**Date:** 01<sup>st</sup> May 2024

**Time:** 10:30 – 11:45

**Location:** Atlantic Centre, Newquay

**Facilitator:** Dr Wendy Thomas

This workshop provides an awareness of The Blank Levels as a framework that can be used by schools to support planning, identification of children who may require more support in understanding language around them and within their learning.

There will be the opportunity to look at whole school level approaches, targeted approaches, assessment and intervention for children who may require this.

The Blank Levels is an approach that is best placed at a whole school level where all staff have an awareness and understanding of this.

This workshop will provide an initial overview and awareness raising for those who have a strategic position in school and who may be interested in piloting the development of this approach in their settings..
